ABOUT ME

I am eager to join a company with room to grow. I want to continue developing my skills, gain new experiences, and grow professionally. I am constantly seeking out new opportunities to learn and grow. Now I am learning Python, aiming to leverage automation tools and techniques in addition to manual testing. I am sociable and easily establish connections with other people. I have a keen sense of boundaries to avoid being intrusive, which is why I always try to solve issues independently and only seek assistance as a last resort. I contribute positively to any team I will become a part of. My background in HR and accounting can bring a unique perspective to the team.
